Project Overview

The existing booking system currently operates on Domain A. The requirement is to transfer the complete booking system to Domain B and implement key functional enhancements for improved payment, authentication, and communication processes.

This proposal outlines the technical tasks, scope of work, and approach to ensure smooth migration and seamless integration.

Scope of Work

- 1. Migration of Booking System from Domain A to Domain B
 - Transfer complete booking application from Domain A to Domain B.
 - Update application configurations (environment files, base URLs, routes, asset links, API endpoints) to reflect the new domain.
 - Review and modify hardcoded URLs within controllers, views, and scripts to ensure smooth functioning on Domain B.
 - Test and validate the booking workflows (search, booking, confirmation, payment, cancellation) after migration.
- 2. Razorpay Payment Gateway Integration
 - Apply for and configure a new Razorpay merchant account dedicated to Domain B.
 - Integrate Razorpay Payment Gateway into the booking system.
 - Implement test and production environments for transactions.
 - Validate successful payment processing and response handling (success, failure, cancellation).
- 3. OTP Authentication on Phone and Email
 - Develop OTP (One-Time Password) feature for:
 - Mobile Verification via SMS API.
 - Email Verification via system-generated email.
 - Integrate and configure reliable SMS Gateway API (provider to be finalized).
 - Implement OTP generation, expiration (time-limited), and secure verification logic.
 - Modify user booking flow to include OTP verification before final confirmation.
- 4. Booking Confirmation Email System
 - Design and develop confirmation email templates (responsive HTML).
 - Auto-generate email confirmation containing:
 - Booking ID
 - Guest Details
 - Payment Information
 - Check-in & Check-out Details
 - Integrate with Laravel Mail system (using SMTP or Mail API such as SendGrid/Mailgun).
 - Ensure emails are triggered upon successful booking action and payment confirmation.

Deliverables

- Fully migrated booking system on Domain B.
- Configured and tested Razorpay payment integration.
- OTP authentication via Phone & Email.
- Automated Booking Confirmation Emails.
- Complete system documentation and admin training (if required).

Timeline (Tentative)

Task Duration

- Domain migration & setup 1 Day
- Razorpay integration & testing 4 Days
- OTP feature development & SMS API integration 4 Days
- Email template design & integration 2 Days
- Testing & QA 3 Days
- Total Estimated Duration 14 Days

Cost: 12000/-

Conclusion

This proposal ensures a smooth transition of the booking system from Domain A to Domain B while strengthening its functionality through secure payment integration, OTP-based authentication, and automated email confirmations.

Thank You!
